SALES@VERTICS.NET

Vertics 2.0 is a comprehensive and integrated Software Solutions designed and developed by Trans Emirates Systems, It has been conceived by a blend of seasoned professionals with rich and relevant experience.

WHY VERTICS

CUSTOMIZATION

Chances are that no accounting software will exactly match your business's needs. That's why you'll want to look for a product that allows the easy customization of statements, forms, reports, screens, help systems and other program facets.

STUNNING REPORTING

View or export your reports in HTML, PDF and Microsoft Excel formats. Reports will provide use case models, use case reports and requirements hierarchy reports.

DATA SECURITY

Data Security and protection is vital to all of our customers. For this reason, we provide weekly redundant backups. (Cloud backup service also available upon request)

EXPANDABILITY

Your business may grow in scope as well as size. The accounting program vendor should either offer add-on modules that allow customers to slap extra capabilities to its product, or a migration path to a full ERP environment.

USABILITY/ LEARNABILITY

The amount of efforts or time required to learn how to use the software is very less. This software is very user-friendly even for IT-illiterate people.

MODULES & FEATURES

INQUIRY & SALES

The sales module provides in-depth insight into the main business processes of sales and distribution, such as inquiry, quotation, deliveries, invoicing, customer credit, backlog management, discount management, sales returns handling, statistics and follow-ups, accounts receivable etc...This module comes with a complete Enquiry Manager which helps to track the performance of your team.

PROJECTS

The project management module comes with everything you need to track and manage projects. It offers an array of features like, managing BOQ's, Manpower and other over heads of project. This module comes with varieties of project related reports which help to increase team productivity and reduce burnout.

RFQ Register

This help to register all the enquiries in the system and the enquiry can assign to the concern estimation engineers for proceeding further. We can easily track the status & age of each enquires through this option.

Resource / Material Allocation

Whatever your project is, you want your ERP system to be a tool that keeps people, parts and processes on track. Through Vertics ERP you will be able to allocate resources such materials, man power or others where and when they are needed.

Estimation / Costing

Projects are sold based on estimated costs plus markup. Vertics ERP has a complete tool to prepare the project estimation and track actual costs as the project moves along and provide comparisons to the estimate to help ensure profit at the completion.

Real-Time Information Access

One of the major features of ERP project management systems is the ability to provide common up-to-date information in real-time to all the people involved from management to execution levels.

PROCUREMENT / PURCHASE

The module deals with sending purchase requests to multiple suppliers, receiving quotations and generating purchase orders to suppliers and finally making goods receipt voucher and goods receipt note etc.

INVENTORY / STORE

The module deals with the stock maintenance, tracking of stocks in and out, fast moving & slow-moving items, goods conversions, transfers, adjustments & items reorder notifications etc...

HR & PAYROLL

The Payroll module calculates monthly payroll in one click. It takes (Basic salary + Allowances + Over time) - (Deduction + Absents). And the HR module helps to maintain employee records and it can attach documents of employees along with each employee records to view them later when needed. One of the features of HR module is document expiry reminders which help the HR manager to renew the employee specific documents like passport, visa, insurance and all other on time.

FINANCE

Save time and increase the accuracy of your financial records with automated ledger updates and reconciliation. Our finance module also provides smart budgeting, forecasting and reporting tools with easy-to-use forms designed to meet all of your business needs.

REPORTS

Vertics ERP 2.0 delivers fast, flexible dashboards and reports which can bring all of your company information together in one place to easily perform sophisticated business analysis. It empowers users to make better decisions, faster with interactive visualizations including chart & graph reports.

ADMINISTRATION

This module allows creating multiple companies & users. The super administrator can create users and assign different user roles to the members of your team in different departments such as HR, Accountant, sales executive etc... Each role comes with its own capabilities and restrictions. The administrator can also create new role with custom privileges.

DEPLOYMENT TYPE ▶ Cloud \ On Premise

PAYMENT TYPE ▶ Onetime \ Monthly

The most convenient platform to organize and track new leads and interaction with existing clients, partners, agents and other contacts.

MODULES

- ▶ Customers with Login
- ▶ Leads
- ▶ Sales Man
- ▶ Projects
- ▶ Tasks
- ▶ Milestones
- ▶ Quotation
- ▶ Proposals
- ▶ Invoicing
- ▶ Receipts

WHY VERTICS CRM

- ▶ 100% Improvement in lead conversion rates
- ▶ Revenue increase per sales person
- ▶ Improvement in customer retention
- ▶ Shorter sales cycle
- ▶ See all customer interactions and transactions
- ▶ Manage upsell, cross sell, and renewals of existing customers
- ▶ Know what customers bought and what they want
- ▶ View service issues, pending orders, overdue invoices

CUSTOMIZE YOUR WORKFLOW

Different teams need different things at different times, so flexibility is key. Customize your CRM interface to meet the specific requirements of your organization. Add custom reports, menu's to manage your unique needs. Manage multiple business processes within your CRM using Layouts.

REPORTS AND SALES FUNNELS

A quick look at the sales funnel gives an immediate account of transactions in progress and their respective stages. Stages can be added easily and each one appears in a separate line and different color. The length of the line corresponds to the total sum of the deals at that stage, and a table with the numeric values is displayed below the funnel. Importantly, Vertics CRM lets you have unlimited sales pipelines and build multiple sales funnels if you have several product lines or profit canterers.

CRM DASHBOARDS

Dashboards in CRM are instant snapshots of the most important sales activities. Each agent can see how many deals they've won, how many clients haven't been invoiced yet and so on. Dashboards are currently available for deals, leads & invoices, to do list, project updates etc.

VERTICS HRMS

An able workforce is an asset. Managing human resources well and retaining them, is therefore crucial in order to meet your business goals and objectives. While an automated and technologically sound solution greatly supports you in this endeavor, it brings with it challenges of maintenance costs and integration with other software and systems. Our on demand Vertics Human Resources Management Solution (Vertics HRMS) helps you overcome these issues, covering the entire human resource management cycle, to give you a cost efficient and reliable system. Beginning with recruitment, our solution assists you through various phases of resource management in your organization. The solution also helps you keep track of the career development of employees through promotions, appraisals, transfers, etc. and tracks parameters such as leave, loans, advances, claims and so on. Using our solution, you can better manage and utilize your workforce, while reducing the administrative tasks and paper work needed for it.

Simple and easy to use, our solution can be accessed anytime and gives you:

- ▶ Reduce time-consuming and error-prone clerical work by centralizing, tracking, and reporting employee data that may be scattered across multiple systems.
- ▶ Manage your employee information more effectively with a set of powerful tools.
- ▶ Ensure government compliance to avoid company risk in meeting federal and state rules, regulations, and reporting requirements.
- ▶ Closely monitor employee records and personnel actions, HR compliance, benefits administration, absence management, reporting (standard and custom), and data import/export actions.

BENEFITS

Bringing industry best practices to your HR functions, Vertics HRMS lets you assess and utilize your human resource potential completely. The solution:

- ▶ Increases the operational efficiency and productivity of your HR department v Reduces HR administrative costs v Increases employee engagement and satisfaction
- ▶ Ensures seamless flow of information between employees, supervisors, managers and administrators v Improves leadership development and succession
- ▶ Enhances data integrity within the enterprise
- ▶ Enables you to meet compliance and audit requirements
- ▶ Enables you to view graphical analysis of data using the analytical widgets

PAYROLL

Vertics HRMS Payroll If you want complete control over your payroll process and sensitive payroll data, Vertics HRMS Payroll enables you to produce accurate, timely payroll in-house and gives you complete control over your payroll process and sensitive payroll data. Simplify your organization's payroll processing with selection lists and anytime check processing. We'll keep you in compliance with ever-changing tax laws through quarterly updates, including tax tables. Vertics HRMS Payroll can produce U.S. or Canadian payroll or support a combination of both if your organization operates in both countries. The advantages of in-house payroll processing are the tight integration with Vertics HRMS, the comprehensive reporting, the last-minute changes you can make if needed, and the comforting assurance that you are in total control.

VERTICS RESTAURANT POS

Vertics POS is the Cloud-based POS for restaurants and bars. Vertics POS runs every type of restaurant from QSR to fine dining, pizzerias, enterprise franchises and sports stadiums. Vertics has got innovative feature sets, such as Table and waiter management, central kitchen and warehouse, inventory management and food cost tracking to the ingredient level, and much more.

ADMINISTER ALL YOUR CHAIN RESTAURANTS FROM THE HEAD OFFICE UNIT

Vertics POS head office module is developed specifically to bring all your business in one place. Whether it is chain of restaurants or franchises, through our restaurant management system, you can easily control various functions of all your F&B businesses like track live status of sales, stock and inventory, menu items and more from one location.

- ▶ Sync
- ▶ Control from one location
- ▶ Dashboard View
- ▶ User Account

STOCK AND INVENTORY MANAGEMENT

One of the most tedious tasks in restaurant management is Inventory and Stock management. Any kind of error in this will lead to an outpouring of confusion in all departments. The sophisticated stock and inventory management module of eZee restaurant software is a stickler for detail which lets you efficiently manage the stock, decrease wastage and track item usage. The advance tracking and reports keep you up to date with the inventory levels and see the fluctuating demands in your store, allowing for better cost saving decisions.

- ▶ Real-time inventory
- ▶ Set stock levels
- ▶ Transfer of items
- ▶ Inventory & Stock

GIVING EVERYTHING ON YOUR FINGERTIPS, EASILY SWITCH FROM ONE ORDER TYPE TO OTHER

Get direct access to all operation modes right from the main dashboard. This reduces errors in order type and increases speed of service. Get the flexibility to choose from Dine In, Delivery, or Take Away, making it easier for the staff to track the order type and simplify the billing process with restaurant management system. Moreover, through the Kitchen Display System (KDS), all orders are immediately displayed in the kitchen to jump start the order preparation resulting in quicker and better service.

- ▶ Dine In
- ▶ Delivery
- ▶ Take Away
- ▶ Kitchen Display System

KEY FEATURES

Manage your items with minimal complexity

Enter unlimited products and categories, modifiers and variants. Customized sales screen with your own brand color and Product and Services images. You can sell gift cards as well!

Recipe Management & Food Costing

Configure ingredients and sub-recipes, build recipes in minutes, tweak quantities and instantly see the effect of ingredients on the cost of your menu items; stay on top of your profitability. Vertics R-POS features incredibly powerful food costing and menu engineering.

Fast Order Taking

Quickly select menu items by category or search by name. Top selling items are listed under Frequent Items. Categorize by order type, enter guest information, save and edit at a later time.

Kitchen Display System (KDS)

Eliminate miscommunication between your staff. The system will send the order automatically to kitchen display and the chef/coffee maker can modify the status of order easily.

See Order Details

Manage all your orders in one place. Whether you want to view yesterday's orders or see how many To-Go orders were made, Order Management makes it all convenient. View order status, order number, payment type, time. Additionally, orders can be filtered by date, searched by order number, cancelled etc

Get key business insights from your sales data

Get a Daily Summary at the end of each business day, view Top Selling Items, and print Sales Reports. See Total Sales for the day according to cash, credit, refunds, etc. Total Number of Orders and Items Sold allow you to quickly estimate how busy your restaurant was for the day.

Be in the know - anytime, anywhere

All your data is backed up to the Cloud for easy and secure access from anywhere. The management can login and get the information about what's going on in your restaurant in real-time.
