Vertics 2.0

Vertics 2.0 is a comprehensive (VAT Compliant) Business Management Software suitable for medium to large trading, service, retail, wholesale & manufacturing companies. It has been conceived by a blend of seasoned professionals with rich and relevant experience.

Sales
Make the most of your customer interactions, save time processing orders and create detailed quotes, DO and invoices with our integrated sales module.

Inventory
Trace items from cradle to grave and increase the capacity and accuracy of your operations with our advanced inventory management capabilities.

Purchase
Reduce costs with our purchasing tools and keep on top of quotations, orders and sub-contractor interactions.

Finance
Save time and increase the accuracy of your financial records with automated ledger updates and reconciliation.

Key Features

Easy Customization
Chances are that no accounting software will exactly match your business's needs. That's why you'll want to look for a product that allows the easy customization of statements, forms, reports, screens etc.

Usability / Learnability
The amount of efforts or time required to learn how to use the software is very less. This software is very user-friendly even for IT-illiterate people

Data Security
Data Security and protection is vital to all of our customers. For this reason, we provide weekly redundant backups.

Stunning Reports
Vertics 2.0 delivers fast, flexible dashboards and reports which can bring all of your company information together in one place to easily perform sophisticated business analysis. It empower users to make better decisions, faster with interactive visualizations including chart & graph reports.
